Mathematical Methods for Curves and Surfaces

By -

Springer. Paperback. Book Condition: New. Paperback. 446 pages.

Dimensions: 9.2in. x 6.2in. x

1.1in. The Seventh International Conference on Mathematical Methods for Curves and Surfaces took place June 26-July 1, 2008, in Tønsberg, Norway. The earlier conferences in the series took place in Oslo (1988), Biri (1991), Ulvik (1994), Lillehammer (1997), Oslo (2000), and Troms (2004). The conference gathered 165 participants from almost 30 countries who presented a total of 129 talks. This includes nine invited talks and seven mini-symposia.

This book contains 28 original articles based on talks presented at the conference. The topics range from mathematical analysis of various methods to practical implementation on modern graphics processing units. The papers reflect the newest developments in these fields and also point to the latest literature. The papers have been subject to the usual peer review process, and we thank both the authors and the reviewers for their hard work and helpful collaboration. We wish to thank those who have supported and helped organize the conference. First and foremost it is a pleasure to acknowledge the generous financial support from the Department of Informatics and the Centre of Mathematics for Applications (CMA) at the University of Oslo, and the Research Council of Norway. We would also like to thank Andrew McMurry for his help with technical matters, and Sara Mørken for help with the registration.

November 2009
The Editors: Organization Organizing Committee and Editors
Morten Dæhlen University of Oslo, Norway Michael Floater University of Oslo, Norway Tom Lyche University of Oslo, Norway Jean-Louis Merrien INSA de Rennes, France Knut Mørken University of Oslo, Norway Larry L. Schumaker Vanderbilt University, USA
Invited Speakers: Jean-Daniel Boissonnat, Sophia Antipolis, France Massimo Fornasier, Linz, Austria Tom Hughes, Austin, USA Jrg Peters, Gainesville, USA Ragni Piene, Oslo, Norway Robert Schaback, Gttingen, Germany Peter Schröder, Caltech, USA

Reviews

It is one of the best publications. It really is really intriguing through reading through period of time. You will not feel monotony at any time of your own time (that's what catalogs are for relating to in the event you request me).

-- Dr. Pat Hegmann

It is one of my favorite publications. It is among the most awesome publication I have gone through. I am just quickly will get a delight of reading through a published publication.

-- Prof. Martin Zboncak DVM
