What was the nature of the soil on which you made these experiments? A. The soil of the 8 plots to which I referred is a mixed sandy and clay loam, the sand predominating, and the four acres referred to in the other experiment had a dark sandy loam without any appreciable amount of clay. Q. Have you tried it on clay? A. Yes, we have tried the sowing of clover with grain on clay soil and it works very well. We had some 10 acres last year ploughed under of such land. Q. The trouble is to get a good growth the first year in a clay soil? A. We have not found any difficulty on the Experimental Farm, but none of our land would be regarded as very heavy clay. By Mr. Sproule: Q. When was this clover ploughed under? about what time of the year? A. About the middle...
