By Paul S. Alexandroff

Dover Publications Inc., United States, 2003. Paperback. Book Condition: New. 208 x 132 mm. Language: English . Brand New Book. The author proceeds from the basics of set-theoretic topology, through those topological theorems and questions which are based upon the concept of the algebraic complex, to the concept of Betti groups which binds together central topological theories in a whole and upon which applications of topology largely rest. Wholly consistent with current investigations, in which a larger and larger part of topology is governed by the concept of homology, the book deals...
