Hydrometeorology of tropical montane rainforests in West Malaysia

By SANAR KUMARAN (Sanath)

VDM Verlag Jul 2010, 2010. Taschenbuch. Book Condition: Neu. 220x150x19 mm. Neuware - In the book you are holding, you will understand the micro-climate, hydrometeorological processes, cloud water interception and elements of canopy water balance model of two contrasting montane rainforest types in Cameron Highlands, Pahang, Malaysia. The study was carried out at Mount Brinchang, at two elevations (lower montane forests: 1600m a.s.l. and upper montane forests: 2031m a.s.l.). Using standard weather stations and louvered fog gauges; rainfall, cloud water interception, air temperature, relative humidity, wind speed and solar radiation were recorded continuously from 1 November 2003 through 28 February 2005. The Penman-Monteith evaporation was estimated for both forest types. In addition, throughfall and stemflow in 0.02 hectare plots at both elevations were measured weekly. The vegetation structure of trees (5cm diameter) at both forest sites was also studied. Quantitative evidence is obtained for the first time in Malaysia on cloud water interception and selected elements of canopy water balance for Malaysian montane rainforests. 312 pp. Englisch.

Reviews

Merely no words to spell out. It is amongst the most awesome publication i have read. Your life span will likely be transform as soon as you full reading this book.

-- **Marvin Okuneva**

Completely among the best publication I have got at any time go through. I have got go through and so i am confident that i will likely to read again once more down the road. It is extremely difficult to leave it before concluding, once you begin to read the book.
